Spotlight on Safety: Kodak Recognizes Optimization's Performance in 2009

ROCHESTER, NY – Eastman Kodak Company has recognized Optimization for Supplier Safety Performance in 2009. The recognition comes after Optimization reduced incidents by over 50 percent and worked over 640 days without lost time. Optimization is also pursuing OSHA VPP certification and will soon approach 1 million work hours without lost time.

“[Optimization] demonstrated hard work in the area of safety in 2009, and as a result exceeded our goal of 50 percent reduction from 2008, which is an accomplishment to be proud of,” says Sharon DiTucci, Tenant Relations at Eastman Kodak Company.

“On behalf of all the employees of Optimization, we are honored to accept the Eastman Kodak Safety Award for 2009,” says Doug Dobson, COO of Optimization Industrial Services (OIS). OIS is a multi-trade team of experienced journeymen supporting installation, construction and maintenance requirements for industrial clients.

“We value our safety and the safety of the clients that we work for on a daily basis,” Dobson says. “It’s part of our culture.”
