### **Optimization Surpasses 1,000,000 Hours without a Lost Time Incident**

ROCHESTER, NY – Optimization is pleased to announce that the company has accumulated over 1,000,000 consecutive hours worked without a single lost time incident, a milestone that was roughly 20 months in the making.

For any company in construction, maintenance and manufacturing, reaching 1,000,000 hours without lost time is a difficult feat. Bill Pollock, Optimization president and CEO, hails employees' commitment to safety as the main ingredient for this accomplishment. "There are very few groups of employees anywhere who take safety as seriously as those at Optimization," says Pollock. "Al Manzer and the safety committee provide guidance but it takes training and diligence to accomplish a milestone like this. We are very proud of the Optimization team."

Optimization was also recently recognized for its accomplishments in safety and quality by Eastman Kodak Company.
